What Makes Us Unique

Hotel Lock & Safe's mission is to be the ultimate finish experts in interior door hardware, defining style and creating desire.

We specialize in offering a broad range of colour matching products which embrace currently trending finishes. Our extensive range of door levers and accessories in matching finishes allows home owners, designers and specifiers to perfectly finish projects, and with confidence, add the finishing touch.

Our enthusiastic, flexible and dedicated team are passionate in providing the simple, honest, and on-time quality service that sets Hotel Lock & Safe apart.

Hotel Lock & Safe prides itself not only on its innovative and beautiful products and finishes, but also on providing the highest level of fast, efficient and friendly service. With our comprehensive network of dedicated merchants and retailers throughout the UK, you are never far away from our beautiful collections of the finest architectural hardware.

With our long carpentry history and experience combined with product knowledge, we strive to deliver the highest quality products to meet today's demanding requirements. We welcome any feedback or experience so that we can ensure this craftsman excellence is available for future generations.

Our Values

Passion 

Passion and creativity drives us to excel at everything that crosses our path. We believe in what we provide and the value it brings, whilst striving to do our best and discover just how good we can really be!

Innovation 

Constant improvement and innovation means we continually grow and develop to meet the needs of our clients, team-players and also the local community. We approach everyday with a willingness and desire to grow, learn and challenge ourselves.

Commitment 

Customer commitment is at the core of what we are. We go the extra mile as a customer centric team. We are also committed to each other within the team creating a strong, positive and respectful culture. We lead and learn from each other. We are committed to be ultimate finish experts, defining style and creating desire.

Integrity 

Integrity, honesty, respect and trust are of paramount importance to us. When we say we will do something, we will do it.

Our Ranges

With more than 100 different designs and 30 beautiful finishes you will find something to compliment virtually every style of room! Browse our collection of ranges to find something that suits you!

MILLHOUSE BRASS

INDUSTRIAL RESTORATION

Embrace the former glory of your industrial interior with Millhouse Brass. The juxtaposition of modern finishes vs time-worn designs creates a layered and considered item of door furniture.

Pages 62-83

TUPAI®

This premium selection of modernistic and timeless models is made unique by the all-new minimal 5S slimline 5mm sprung rose, and enhanced by up to 6 beautiful, modern and trending finishes.

Retaline boasts rich designer aesthetics through levers with a bespoke rectangular feature rose. VERSALINE allows for complete customisation of lever - from lever finish to decorative plate finish.

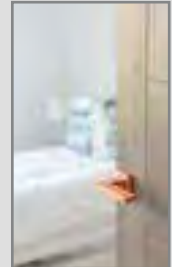

Pages 84-117

forme®

Defined by its innovative yet ageless designs, this beautiful range includes over 18 designs in 11 stunning finishes!

Forme is made unique by the ground breaking "Fixa" fast-fit rose system. The strong and bold Urban finishes enhance the trending styles, making a design statement. The innovative method of Ecotech, using nanotechnology, is a pollution free manufacturing process which is environmentally friendly and produces a strong and durable finish.

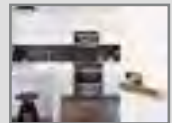

Pages 118-141

senza pari®

Senza Pari, meaning 'without equal', is an Italian designed range of contemporary levers.

The ultra-modern angular shapes and distinct designs are perfect for those who want to stand out and create a strong focal point within an interior.

Pages 142-151

Old English®

From the rustic charm of Distressed Silver to the soft highlights of Matt Antique Brass, our Old English range encompasses a huge range of modern and traditional finishes!

With both levers & mortice knobs in up to 15 finishes, Old English has a way of capturing and refining Britain's architectural heritage, with a charming contemporary twist.

Pages 152-167

Mediterranean®

Inspired by relaxed and inviting Mediterranean living, this collection has been surpassing our customers expectations since the inception of Hotel Lock & Safe. The collection is designed to make a subtle statement of class, and is manufactured to last.

STATUS®

Simply stylish, the Status range is designed to bring elegance and modernity to your contemporary interior. Status represents excellent value for money, whilst ensuring that quality feel.

Antibacterial protection does not need to look clinical and colourless... It can be designer, stylish and bold! Cleantouch offers fashionable protection.

Ermetika®

INSIDE WALLS

Ermetika showcases a range of sturdy, stable and efficient pocket door kits that allow for an invisible but essential smooth functioning pocket sliding system.

Not only do pocket doors save space, but they create a design statement within any interior. You can find Ermetika pocket door systems everywhere, from luxury residential projects, high-end villas, 5-star hotels, skyscraper offices and more...

AGB design and manufacture quality, durable and beautiful locks, cylinders and hinges.

Certified according with EN 1303, AGB's cylinders provide incremental levels of passive and active security. AGB's concealed hinges emphasise the minimalistic look that so many homeowners strive for in today's world.

Hotel Lock & Safe LTD

Along with every stunning lever, should be a complete suite of complimentary ironmongery.

Whether it be matching hinges, a designer door stop or simply a latch and lock faceplate, choose every accessory to reflect your taste. We believe every item of hardware throughout an interior should match and coordinate in style and finish. Explore the range of stunning Matt Black Commercial Hardware, or beautifully coloured Parliament hinges!

Our Finishes

Here at Hotel Lock & Safe we truly believe the finish matters! Whether that be the finishing touch of the project, or the finish and texture of an item.

For us, the finishing touch to any décor is a complete set of complimentary ironmongery. Whether it is levers, hinges, latches, locks or even door stops... remember...

the finish matters

AB - Antique Brass

Antique Brass has rich brown hues and golden undertones that create a warm, inviting appeal. This finish closely resembles the look of natural brass and is undeniably Victorian, with hints of Colonial Era style occasionally peeking through. The high-gloss finish gives it a touch of the modern world. For accompanying products, we recommend using either Antique Brass, Matt Antique Brass or Polished Brass.

AC - Antique Copper

Antique Copper is an elegant and sophisticated finish with warm copper tones that break through the darker, aged exterior. It is a traditionally inspired finish that finds its style rooted in the Victorian Era, but also heavily in the Arts & Crafts movement. Antique Copper works exceptionally well with ornate, handmade, craftsmen-style furnishings. For accompanying products, we recommend using either Antique Copper or Matt Black.

BNPC - Black Nickel / Polished Chrome

The dual combination of lustrous Black Nickel and mirror-like Polished Chrome is modern and stylish. For accompanying products, we recommend using either Black Nickel or Polished Chrome.

BN - Black Nickel

The Black Nickel finish is highly polished with a bright nickel under-plate resulting in a deep, lustrous, jet-black finish often referred to as "black chrome". It is best described as a blend of polished chrome and matt black resulting in a shimmering black. For accompanying products, we recommend using either Black Nickel, Matt Black or Polished Chrome.

BP, PB, EB - Polished Brass Plated

The Polished Brass finish is highly reflective, with a warm golden sheen that lends the finish a certain vintage appeal. This finish is commonly found in older, traditional homes - particularly those styled in the 1990's. The widespread availability of Polished Brass makes it easy to find and, therefore, easy to match with other hardware, fixtures and accessories. For accompanying products, we recommend using either Polished Brass or Antique Brass.

DS - Distressed Silver

Distressed Silver is a textured finish that is full of character. It boasts refined silver hues and dark undertones that thrive in a refurbished industrial space with a rustic vibe that is reminiscent of the Old World. Today, the finish is growing increasingly popular and can be seen in urban settings in cities across the globe and likewise rural environments such as rustic barn conversions. For accompanying products, we recommend using either Distressed Silver or Matt Gun Metal.

MAB - Matt Antique Brass

Matt Antique Brass is perfect for modernised barn conversions where style and taste is desired! This finish boasts golden undertones and brown hues of Antique Brass whilst having a modern matt finishing touch. For accompanying products, we recommend using either Matt Antique Brass or Antique Brass.

MB - Matt Black / Pearl Black

The striking appearance of the Matt Black finish creates an elegant look that's sure to be noticed in any setting. Matt Black is unique in its ability to serve as a bridge between the worlds of modern and traditional styles. It's a fashionable urban finish that caters to a modern look. Matt Black takes style cues from Bauhaus homes, wrought iron fences and fixtures made by blacksmiths in the Colonial Era. For accompanying products, we recommend using either Matt Black, Black Nickel or Matt Gun Metal.

MBN - Matt Gun Metal

Matt Gun Metal is a stunning combination of metallic silver and taupe grey. It infuses elegance and defines style on any item it coats. This is a very attractive and unique finish, which is light and slightly brushed. With the industrial trend growing in recent years, Matt Gun Metal is a firm favourite with many. For accompanying products, we recommend using either Matt Gun Metal or Distressed Silver.

PAA - Polished Anodised Aluminium

This finish is very similar in looks to Polished Chrome finish, with a mirror-like shine to the surface. For accompanying products, we recommend using our Polished Chrome or Polished Stainless Steel.

PC, CP - Polished Chrome

The smooth-mirror like finish of Polished Chrome gives it a dramatic allure that never fails to make a statement. Polished Chrome finds its inspiration in the Art Deco movement and the jazzy style of the roaring 20's, but is able to seamlessly transition into the minimalist approach of the 1930's and 40's as well. For accompanying products, we recommend using either Polished Chrome, Polished Nickel or Polished Stainless Steel.

PL - Pearl Nickel

Pearl Nickel is a glamorous designer finish with adaptability that allows it to blend into nearly any décor without being overlooked. It is inspired by the timeless sophistication of the Victorian Era. This finish has a slight sheen and its colour and appearance can change with a simple change of lighting. For accompanying products, we recommend using either Pearl Nickel, Satin Stainless Steel or Satin Nickel.

PN - Polished Nickel

The Polished Nickel finish is a glamorous designer finish that's adaptability allows it to blend into nearly any décor without being overlooked. It was inspired by the timeless sophistication of the Victorian Era. Due to the fact this finish is made from nickel, its colour and appearance can change with a simple change of lighting. For accompanying products, we recommend using either Polished Nickel, Polished Chrome or Polished Stainless Steel.

PSS - Polished Stainless Steel

Stainless Steel is composed of a variety of metals, with no less than 10% chromium. Stainless Steel is widely recognised as one of the most durable metals because of its high resistance to rust and corrosion. For accompanying products, we recommend using our Polished Chrome finish.

RB - Raw Brass

Raw Brass is a stunning, elegant, living finish with excellent characteristics for a modern home. For accompanying products, we recommend using our Polished Brass finish.

SAA - Satin Anodised Aluminium

Satin Anodised Aluminium has a smooth, fine and metallic look. For accompanying products, we recommend using either Satin Stainless Steel or Satin Chrome.

SB - Satin Brass

Satin Brass is the epitome of modern elegance. With subtle hints of gold that are bold without being over the top, this finish has the perfect amount of understated style. The Satin Brass finish is quickly becoming one of the most popular choices for the home as a modern upgrade to Polished Brass—especially evident in furniture and interior trends, where the matt look of the Satin Brass finish won't show fingerprints or tarnish easily. For accompanying products, we recommend using either Satin Brass, Polished Brass or Matt Antique Brass.

SC - Satin Chrome

Satin Chrome has a moderately contemporary look and feel that takes its origins from the Bauhaus style movement. The subtle lustre is edgy and alluring but never grandiose. It is considered to be a highly amenable finish and is often used in commercial applications. For accompanying products, we recommend using either Satin Chrome, Satin Nickel or Satin Stainless Steel.

SCPC - Satin Chrome / Polished Chrome Plated

A stunning combination of Satin Chrome and Polished Chrome creating a moderately contemporary look. For accompanying products, we recommend using either Satin Chrome or Polished Chrome.

SE - Silver

Our Silver finish is a close shade to Satin Chrome but with a increased matt effect and slightly less brushing. For accompanying products, we recommend using our Satin Chrome finish.

SN - Satin Nickel

Satin Nickel is a versatile finish, full of brushed silver hues, that offers a tasteful and flattering accent to any project. This finish saw its rise to popularity alongside the Victorian and Mid-Century Modern design movements. Satin Nickel looks stunning against dark colours like black, navy blue or grey. Its Mid-Century Modern design roots mean it prefers to live among bold, geometric shapes and patterns, bright solid colours and edgy, unconventional furniture. For accompanying products, we recommend using either Satin Nickel, Satin Stainless Steel or Satin Chrome.

SNBP - Satin Nickel / Brass Plated

The combination of brushed silver Satin Nickel with golden Polished Brass. For accompanying products, we recommend using either Satin Nickel or Polished Brass.

SNCP - Satin Nickel / Polished Chrome Plated

A popular finish for something that is eye-catching but also contemporary with the combination of brushed silver Satin Nickel and mirror-like Polished Chrome. For accompanying products, we recommend using either Satin Nickel or Polished Chrome.

SNNP - Satin Nickel / Polished Nickel Plated

The combination of brushed silver Satin Nickel and glamorous Polished Nickel. For accompanying products, we recommend using Satin Nickel or Polished Nickel.

SSS - Satin Stainless Steel

Satin Stainless Steel is a grey colour with very slight golden undertones. It has visible brush marks in the surface of the finish. For accompanying products, we recommend using Satin Chrome or Satin Nickel.

TT - Titanium

Moody and deep Titanium is a cool metallic hue close to a dark bronze. It compliments modern products with a futuristic appeal and adds a flair of intrigue to classic designs. For accompanying products, we recommend using either Titanium, Urban Dark Bronze or Matt Gun Metal.

UB - Urban Bronze

Urban Bronze takes the modern Industrial look to the next level, achieving a unique finish that is contrasting in warmth and depth of character. Urban Bronze has golden highlights as the visible brush lines highlight the relief and texture in the finish. For accompanying products, we recommend using either Urban Bronze, Urban Dark Bronze, Matt Antique Brass or Matt Gun Metal.

UDB - Urban Dark Bronze

Urban Dark Bronze is a darker take on our Urban Bronze finish. It is rich and luxurious in colour and matt in texture. A strong, bold and impressive urban finish. For accompanying products, we recommend using either Urban Dark Bronze, Urban Bronze or Matt Gun Metal.

UG - Urban Graphite

Urban Graphite finish has contrasting textures resulting in a rich appearance that sits well in stylish, modern homes but also offers a characterful alternative for rustic settings. For accompanying products, we recommend using either Urban Graphite, Matt Gun Metal or Distressed Silver.

USC - Urban Satin Copper

The Urban Satin Copper finish is an ever increasing favourite in the design world. Urban Satin Copper's metallic look brings a warm glow into the home creating a designer statement. For accompanying products, we recommend using either Urban Satin Copper or Satin Chrome.

WAB - Weathered Antique Bronze

As Pierre Bonnard once said... 'Colour does not add a pleasant quality to design - it reinforces it'. This has never been truer than with Senza Pari's luxurious Weathered Antique Bronze finish! The warm yet industrial hues are on-trend and compliment modern sleek designs. Ideally suited to a modern décor scheme in contemporary style homes, but equally matched to traditional settings due to the pleasant, calm tones. For accompanying products, we recommend using either Weathered Antique Bronze or Matt Antique Brass.

WH - White

A modern and trending finish in the world of interior hardware. White has the ability to create a statement piece in many interiors, especially when fitted on colour doors. For accompanying products, we recommend using our White finish.

YB - Yester Bronze

Yester Bronze boasts warm, industrial shades of golden brown. Rich in texture, this finish is perfect for modernised barn conversions where style and taste is desired. For accompanying products, we recommend using either Yester Bronze or Matt Antique Brass.

Finishing on some ranges may vary slightly from one batch to another, due to the hand finishing techniques used in production. Finishes may also vary between products due to the base material of the item, which affects the way the finish is applied to the product. Our levers are supplied with suitable fixings for 35-45mm doors only. Fixings for larger doors can be supplied on request but will be charged for.

All of our zamak and zinc alloy designer levers are designed for internal use only, and therefore the guarantee is voided if fitted externally. All products should be comprehensively checked before fitting commences.

Urban Matt Black

Matt Black is a highly fashionable and trending finish encompassing an ever growing collection of levers, mortice knobs and accessories. Whether coating a traditional mortice knob, or a minimalistic slimline lever, Matt Black never fails to look elegant and bold.

Matt Black

Urban Matt Black

Urban Bronze

Urban Bronze is rich in relief with visible brush marks showing through signs of the lighter & warm golden shades as well as the rich textured darker accents. Urban Bronze encompasses the modern industrial look achieving a feel that has a depth of character. Urban Bronze has detailed relief especially when finished onto Solid Brass, for example the Old English Mortice Knob collection. Urban Bronze is lighter in colour than Urban Dark Bronze.

Yester Bronze

Raw Brass

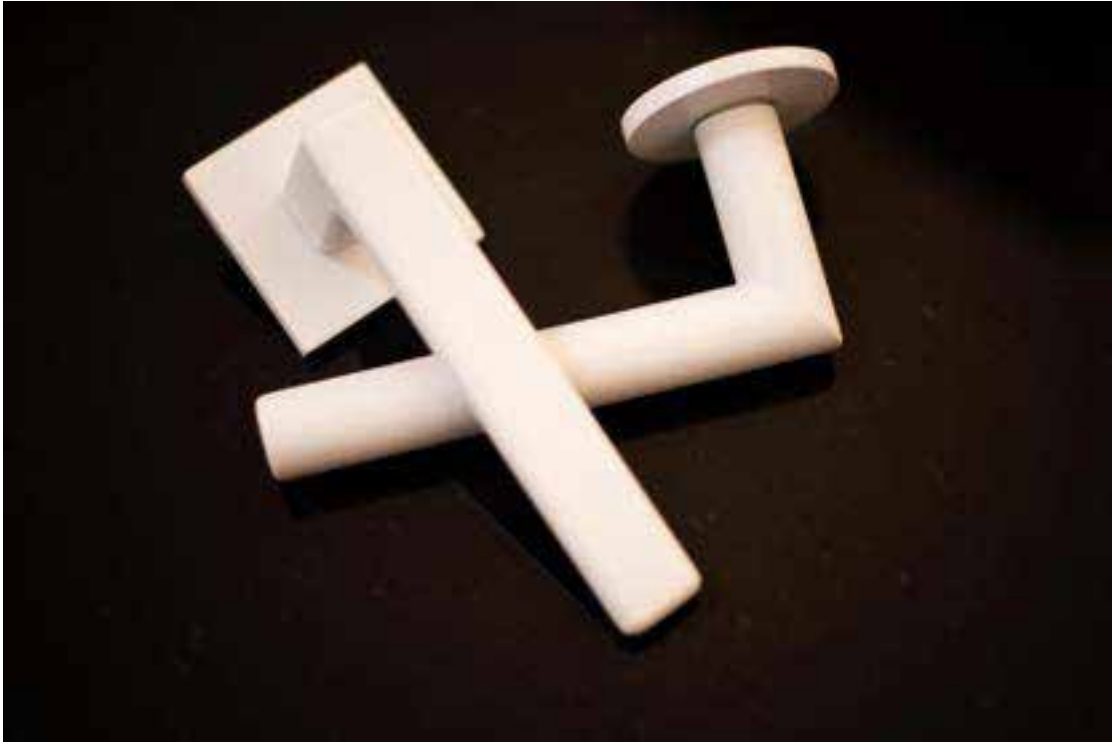

The raw brass finish embraces the natural state of the material where the base material is Solid Brass. It is a living, creative and glamorous finish, and will gradually darken with time! To find out more visit the following product pages: Page 90-92

Raw Brass

White

White has a subtle lustre which is edgy and alluring. This modern and stylish finish is a step above the crowd looking elegant and bold.

To find out more visit the following product pages: Designer Levers: Page 89, 92

THE COLLECTION
Cabinet Furniture

Whether modern or traditional, unique or contemporary, the Atlantic collection of Cabinet Knobs has an offering to complete every style of interior décor.

To find out more about these stunning Cabinet Knobs, visit the following pages:
Traditional: Page 166 Contemporary: Page 166 Knurled: Page 82-83

The Old English range includes traditional quality solid brass cabinet hardware in nine stunning finishes. Match a contemporary finish with a traditional cup pull for a stunning result! (Page 166-167)

MILLHOUSE BRASS

INDUSTRIAL RESTORATION

With detailed, precision knurling the Millhouse Brass range includes luxury, modern statement pieces of solid brass finish focused cabinet hardware. (Page 82-83)

THE COLLECTION

Mortice Knobs

This Hotel Lock & Safe collection includes six styles of hand-crafted, quality Mortice Knobs. From traditional beehive styles, to modern knurling, there is a Mortice Knob to suit any interior. To find out more about these grand Mortice Knobs, visit the following pages:
Traditional: Page 160-163 Contemporary: Page 67-73
Knurled: Page 67-73 Matt Back: Page 67, 160-163

Old English®

Old English showcases Mushroom, Reeded & Ebonywood mortice knobs in 15 traditional & contemporary finishes. A proud statement piece to compliment quality doors! (Page 160-163)

MILLHOUSE BRASS

INDUSTRIAL RESTORATION

Millhouse Brass includes three stunning and contemporary Mortice Knobs covering six finishes. From sleek modern Matt Black to elegant Satin Brass. Including luxurious knurling, these modern designs will bring an element of class to any interior. (Page 67-73)

STYLE FEATURE FOCUS

Slimline 5mm Rose

Featured within the Tupai range and the Millhouse Brass range, the desirable Slimline 5mm Rose is all about being a cut above the normal. Slim, elegant, minimalistic yet bold in design.

Visit the following pages to view these ranges:

Millhouse Brass: Pages 62-83

Tupai Exclusivo: Pages 84-93

Tupai Rapido: Pages 94-117

Knurled Levers: Pages 66, 68, 70, 72, 74, 78

STYLE FEATURE FOCUS

Solid Brass

Solid Brass hardware boasts quality and luxury. Often Solid Brass hardware will weigh considerably more than its zinc alloy or Zamak counterparts providing that superior feel. Solid Brass is strong, durable and extremely resistant to corrosion. When Solid Brass has a finish applied over the top, it is invariably more durable than when a finish is applied over zinc.

Visit the following pages to view ranges which include Solid Brass hardware:

Millhouse Brass: Pages 62-83

Tupai Exclusivo: Pages 84-93

Tupai Rapido: Pages 94-117

Mortice Knobs: Pages 62-83, 160-163

Old English: Pages 160-163

Cabinet Hardware: Pages 82-83, 166

Accessories (Hinges, Hat & Coat Hooks & Door Stops): Pages 219, 244, 245

STYLE FEATURE FOCUS

Fixa Rose

The Forme Fixa Rose

The Forme Fixa rose is unique in its ability to solve problems for joiners, home owners and builders alike. A quick and easy fixing method, providing efficient installation and excellent design style.

Advantages of the Fixa system:

- Fixa eliminates the cost and saves time of replacing levers during a building project as levers can be 'clicked' on and off the fixa plates.
- Doors can easily be re-painted with no damage to the levers.
- The fixing method is easy and hassle free.

Visit the following pages to view the Forme range:

Forme: Pages 118-141

Case Study Inspiration: Pages 250-252, 256

STYLE FEATURE FOCUS

Magnetic Focus

Why Magnetic?

Easy to fit - it takes less time & hassle taken to fit these products!

Seamlessly quiet closing - No noisy door closing! Almost silent due to being magnetic!

Clean, Sophisticated & Elegant - The look of a closed door without a visible striker plate speaks volumes creating a streamline finish!

Flush Finish - There is no chance of catching clothes or arms on protruding latch tongues or striker plates - preventing children from hurting themselves too!

Reliability - We have only heard good words about our mag-latches!

Mag-latch. The perfect solution for a sleek, modern finish to your doorset. With no protruding latch tongues, this latch means the edge of the door is clean and flush. Need a door to lock but also want the benefits of magnetic? Choose from our range of AGB magnetic locks. Offering quality, reliability and style, our magnetic locks come in a variety of sizes. **Visit Page 241 for more!**

INTRODUCING

AGB

**CONCEALED HINGES
CYLINDERS
MAGNETIC LOCKS**

AGB design and manufacture quality, durable and yet beautiful locks, cylinders and hinges. Certified according with EN 1303, AGB's cylinders provide incremental levels of passive and active security. AGB's cylinders have passed strict tests and controls and have extremely high durability.

AGB's concealed hinges emphasise the minimalistic look that so many homeowners strive for in today's world. AGB Concealed hinges are easy to install, minimal in appearance and suitable for a vast range of applications including fire & smoke resistant doors for up to 30 minutes. **Visit Pages 222-223, 235-241 for more!**

INTRODUCING

Pocket Door Systems

Ermetika[®]
INSIDE WALLS

Why choose a pocket door system?

Pocket Doors not only maximise valuable interior space, they're also a design statement. Sleek, streamline and smart. A Pocket Door can transform your space entirely, aesthetically and functionally. What's more, Pocket Doors seamlessly fit into any décor, be it traditional or contemporary.

Ermetika showcases a range of sturdy, stable and efficient pocket doors that allow for an invisible but essential smooth functioning pocket sliding system.

Not only do pocket doors save space, but they create a design statement within any interior. You can find Ermetika pocket doors everywhere, from luxury residential projects to high-end villas, 5-star hotels, skyscraper offices and more...

Visit Pages 206-215 for more!

MILLHOUSE BRASS

INDUSTRIAL RESTORATION

Embrace the former glory of your industrial interior with Millhouse Brass. The juxtaposition of modern finishes vs time-worn designs create a layered and considered interior. Millhouse Brass showcases modern and bold designs but captures every element of the classic Bauhaus style.

MILLHOUSE BRASS

INDUSTRIAL RESTORATION

5MM SLIM ROSE

The Millhouse Brass range features a 5mm slim sprung rose. The slim rose allows the lever to blend into the door, therefore creating a minimalistic streamlined look.

SOLID BRASS

Millhouse Brass designer levers are made from quality solid brass. These premium levers are very durable as solid brass ironmongery weathers well over time under normal circumstances and use.

MILLHOUSE BRASS

INDUSTRIAL RESTORATION

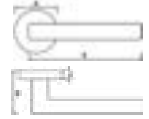

Millhouse Brass showcases elegant and graceful designs but embraces industrial restoration.

THE DETAILS ARE NOT THE DETAILS.
THEY MAKE THE DESIGN.

Charles Eames

retaline

_Retaline showcases a bespoke rectangular feature rose creating a rich designer look and feel.

_Slimline, refined yet sophisticated. This feature rose makes a design statement when compared to their square rose counterparts.

_This range is enhanced by 4 modern finishes, from stunning & stylish satin chrome to the warm hues of pearl nickel.

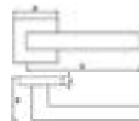

_With Retaline, the rose can be flipped and fitted vertically to create a stunning design feature.

DEFINE YOUR STYLE

VERSALINE

_Versaline...because normal is so overrated. Versaline has versatility at its heart, allowing for freedom to create a designer statement, bespoke to any taste.

_Customise these levers and let your imagination run wild. Choose from a variety of lever designs, many modern and contemporary lever finishes and matching and contrasting finishes of decorative plates, to create a masterpiece within your interior space.

_With a rectangular feature rose, and a stunning selection of decorative plates, Versaline is like no other. Versaline really is versatility at its highest.

Tobar is a truly versatile designer showpiece with both lever finish and decorative plate adaptable to your taste. Choose your desired finish of lever and then select a finish for the decorative plate. Alternatively, purchase without a decorative plate and style to suit your home interiors with an inlay of your favourite fabric or matching aesthetic. Get in touch for more customised made-to-order options.

forme®

entirely made in Italy

Ultimately luxurious, the stunning Forme Designer Lever Collection is entirely Made in Italy, and produced to a quality that only a company with over 65 years manufacturing experience can guarantee.

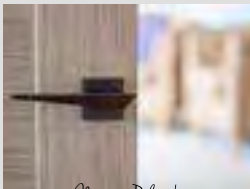

Defined by its innovative yet ageless designs, this beautiful range of handles has now been expanded and developed to include over 18 designs in 11 stunning finishes, all available from stock. Made unique by the ground-breaking new "Fixa" fast fit rose system, this range has become a favourite with quality housing developers, architects and interior designers across the country.

From the understated elegance of the Polished Nickel finish to the bold urban finish of Matt Black, this rapidly developing collection of distinctive door levers with stunning finishes is anything but typical. The strong and bold Urban finishes enhance the beautiful styles, making a design statement that will inspire and entice.

Forme's product finish process named Ecotech is entirely based around Nanotechnology...

What are the benefits?

- 🌿 Cleaner technology
- 🌿 Process is less harmful to the environment & people involved in the production process
- 🌿 High resistance to abrasion
- 🌿 Uniform Coating with the possibilities of achieving innovative colours
- 🌿 Unbreakable bond between finish and metal (Zamak & Brass)

Be Refined

Old English

Be Refined

From the rustic charm of Distressed Silver to the soft highlights of Matt Antique Brass, our versatile Old English range of door furniture has a way of capturing Britain's architectural heritage, with a charming contemporary twist.

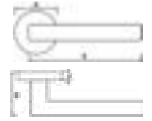

This beautiful collection of ironmongery has been used in a wide range of both residential and commercial applications, from rustic boutique hotels to modernised barn conversions. With 15 stunning finishes to choose from and multiple options of lever on rose, lever on backplate or mortice knob, there is something to add that distinctive finishing touch to your project.

With the addition of our elegant solid brass mortice knobs and accessories collection in modern finishes like Matt Black and Urban Bronze; a touch of sophistication has enhanced and refined the Old English range.

Matching Accessories - Page 165

All Atlantic Mortice knobs are unsprung so must be fitted with a heavy duty double sprung tubular latch. Ensure latch chosen provides sufficient back set to distance the knob from the door frame. On fire door frames we recommend 4" heavy duty latches with Mortice knobs and 3" on a standard frame.

Mediterranean[®]

Be Inviting

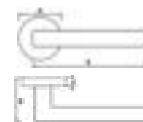

This unique range of elegant and contemporary levers has been beautifully crafted to the highest of standards to add that distinctive finishing touch to your interior. Inspired by relaxed & inviting Mediterranean living and designed to make a subtle statement of class, this range covers over 5 ever-trending finishes.

From warm Satin Nickel, to golden Polished Brass, these finishes coat some of the most popular modern designs. Mediterranean encompass smooth and sleek designs, like Malta and Malaga, that sit perfectly in the hand. Elegant, understated profile levers like Santorini showcase the blend of Satin Chrome and Polished Chrome in a stunning dual finish lever & rose combination.

Antibacterial Protection Ironmongery

Antibacterial protection does not need to look clinical and colourless...It can be designer, stylish and bold! Cleantouch offers fashionable protection - a hospital-level of hygiene in trending finishes & designs.

It is scientifically proven through certified lab results that the anti-bacterial treatment used to coat these products ensures total elimination of bacteria.

As soon as the bacteria comes into contact with the anti-bacterial finishing, the coating immediately interrupts its biological operation. The bacteria can not grow nor reproduce and their life cycle ends.

Although this protection doesn't delay the outbreak of an epidemic, it reduces the risk of spreading. It guarantees the protection of people within their environment.

This particular finishing treatment is not toxic, unlike some anti-bacterial powder varnishes.

Bring hospital hygiene to your home

safety, hygiene and style
fashionable protection

Ermetika®

POCKET DOOR SYSTEMS

We'd like to introduce you to our latest partner brand, Ermetika.

Ermetika was born in Italy in 1987, thanks to the idea of the Spinazzola brothers to create a pocket door system aiming to provide extra usable living space and create a design statement. Over the years, the family business grew from an artisanal production line to a fully automated cutting edge production line. Ermetika prides itself on producing high quality, reliable, framed and unframed pocket door systems as well as flush swing aluminium door frames that are all manufactured at its production site located in Barletta (BT) Italy (certified under ISO 9001).

DOES A POCKET DOOR SUIT ME?

When retrofitting pocket doors into a room where the walls are already constructed and installed, there are a few aspects that must be considered before installation should begin to conclude if a pocket door is suitable. Those aspects include topics such as wall length and thickness, load-bearing walls, wiring and much more. Pocket door installation is a straight forward process when fitting in a new build environment.

Read more
here:

WHY CHOOSE A POCKET DOOR SYSTEM?

SPACE SAVING

Pocket doors create more space within a room as well as making a design statement! Pocket doors can aid to create a safer space too, where wheelchair users are concerned, as opposed to some environments with a traditional hinged door which can hinder movement.

AESTHETICALLY PLEASING

Pocket doors elevate interior spaces to create a modern, fashionable interior; whether you choose a minimalistic frameless pocket door system, or a more traditional framed system.

WHY CHOOSE ERMETIKA?

STRENGTH & FIRMNESS

Ermetika kits have brilliant structural strength with strong metal door frames, and horizontal reinforcements. The extractable rail can be easily checked for quality sliding.

FLEXIBLE & EASY TO SET UP

These kits can easily be adjusted for different wall sizes. The clear fixing points of the system and helpful floor guide allow quick and easy integration.

FUNCTIONALITY

Ermetika kits are specially designed to ensure maximum fluidity in movement whilst maintaining silent sliding when in action.

EVOKIT

EvoKit is a **traditional framed pocket door system**, unlike other pocket door systems in the market. EvoKit is a **strong reinforced product** thanks to its galvanized steel and aluminium construction.

Since it is a Kit, transport and stocking are much easier and the installation is **fast and accurate** thanks to its **snap-fit assembly system**.

Cavity sliding door systems provide **stunning modern aesthetic** solutions and let you save precious floor space while separating it into multiple rooms.

ABSOLUTE EVOKIT

Absolute EvoKit is a **no architrave frameless pocket door kit system**. Absolute EvoKit does **not require trims** and **creates a seamless look** with your finished wall. Ideal for those who want to create minimal design solutions with unique ease and convenience.

This kit allows for the **ultimate modern look**, with the door blending into the surrounding walls due to there being **no architraves** which facilitates a plaster reveal.

EVOKIT FIRE

EvoKit Fire is the innovative pocket door system by Ermetika that is also **fire resistant**.

Matched with an E.I.30 door it offers the option to slow or limit the propagation of flames in the environment it is installed, raising safety and complying with fire regulations.

JAMBS

A jamb, in architecture, is the side-post or lining of a doorway or other aperture. Jambs are fitted to cover the edges of the pocket door framework and the opening into the pocket. The size of the jamb you require is dictated by the **thickness of your door** and the **thickness of your wall**.

Ermetika kits can be fitted with **white jambs** (including white brushes & seals) or **wood jambs**. Wood jambs are ready to be lacquered or varnished as suited and include black brushes and brown seals. More details are beside each kit on the following pages.

EXTRA FEATURES

The Ermetika **soft close system** can be added to any pocket door kit to give additional functionality and a **beautiful glide closing motion**. This system fits into the existing track. To find out more, visit page 215.

Any Ermetika single pocket door system can easily be transformed into a **double door kit** with the Ermetika **Junction Kit**. To find out more, visit page 215.

BUYING GUIDE

/ Find out the **SIZE OF YOUR DOOR**

-
- 2 Select which **POCKET DOOR KIT** you would like:
 - **EVOKIT** (Page 210-211)
 - **ABSOLUTE EVOKIT** (Page 212)
 - **EVOKIT FIRE** (Page 213)
-

- 3 If you have chosen **EVOKIT** in **STEP 2**, select which **COLOUR JAMBS** you require to match your door and then find the row in the relevant jambs table which has your **DOOR SIZE** mentioned. Then work out what width **JAMBS** you will require depends on your wall thickness (info above to help). The last **TWO COLUMNS** of the table show you the final code you will need to use to purchase the item determined by the **JAMB SIZE** you have chosen.

- 4 If you have chosen **ABSOLUTE EVOKIT** in **STEP 2**, then you do not need to choose jambs as these come pre-selected with the kit. Simply find the **ROW** in the table which has your **DOOR SIZE** mentioned. The last **COLUMN** of the table shows you the final code you will need to use to purchase the item.

- 5 If you have chosen **EVOKIT FIRE** in **STEP 2**, then you do not need to choose jambs as these come pre-selected with the kit. Simply find the **ROW** in the table which has your **DOOR SIZE** mentioned. The last **COLUMN** of the table shows you the final code you will need to use to purchase the item.

- 6 If you require **DOUBLE DOORS**, then please add the EACC313 to your list of items to purchase. Only available with EvoKit.

- 7 If you require **SOFT CLOSE**, then please add the items from Page 215 to your list of items to purchase.

- 8 Choose your **POCKET DOOR HARDWARE** (Page 216), and order that also! If your Pocket Door System is for a bathroom you will require a bathroom lock set.

EVOKIT POCKET DOOR SYSTEM

EvoKit is a **classic framed sliding pocket door system**, which comes in **kit format**. Since it is a kit, transport is much easier than a traditional pocket door system. Providing up to 10% more space in a room, Pocket Door Systems are not only a way to make an **modern design statement**, but also a practical way to **save space**.

Installation is fast, easy and precise thanks to the Ermetika **snap-fit** assembly system, reducing installation times and therefore labour costs. The system is also **very adaptable**.

As the EvoKit is a framed pocket door system, Jambes are required with this kit.

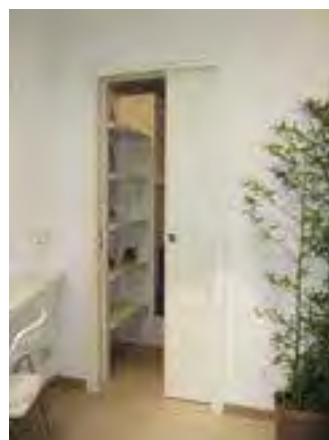

EvoKit Frame

Wood Jambes

Pocket Door in kit form for plasterboard walls

Thanks to its **practical snap-together system**, EvoKit is quick and easy to assemble and creates space in a **stylish way**.

As the EvoKit is a framed pocket door system, Jambs are required with this kit.

Choose which **COLOUR (WOOD OR WHITE)** jambs you would like with your EvoKit system to match your door. Ermetika kits can be fitted with **WHITE JAMBS** (including white brushes & seals) or **WOOD JAMBS**. Wood jambs are ready to be lacquered or varnished as suited and include black brushes and brown seals. Jambs need to be selected to suit the **THICKNESS OF YOUR WALL**. We offer two options for 100mm wall thicknesses, or 125mm wall thickness.

Select the table below which shows the **COLOUR JAMBS** you require and then find the row which has your **DOOR SIZE** mentioned. The last **TWO COLUMNS** of the table show you the final code you will need to use to purchase the item determined by the **JAMB SIZE** you have chosen.

ABSOLUTE EVOKIT

Absolute EvoKit is a **frameless pocket door kit system**. With an easy to remove track for any future maintenance; Absolute EvoKit does **not require trims or architraves**, and creates a **seamless look** with your finished wall.

This kit allows for the **ultimate modern look**, with the door blending into the surrounding walls due to there being **no architraves** which facilitates a plaster reveal. Absolute EvoKit has no jambs but aluminium edges instead, which create a clean and neat finish.

Ermetika's Absolute Evokit creates **more space** within the room in a desirable, attractive way. The kit runs smoothly along the tracks offering a **beautiful gliding motion** and is quick and easy to assemble. Ermetika kits are fully tested for **100,000** opening and closing cycles.

FIRE RATED

ADJUSTMENTS

WOOD/
ALUMINIUM

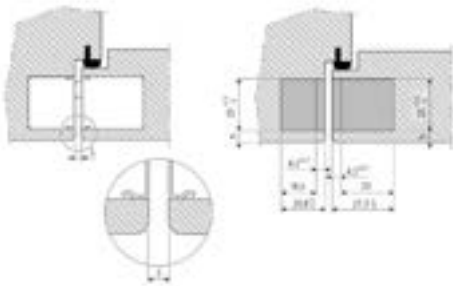

CAPACITY
40KG/60KG

Key Features of the AGB Concealed Hinges

- Ideal even for **aluminium** frames, thanks to the 4mm thickness of the hinge fastening
- **Completely invisible** thanks to slim dimensions
- Easy installation: sash & frame parts can be **installed separately** during production and joined on-site
- Suit **wooden or aluminium** doors
- When the door is closed nothing can be seen of the hinge - **ideal for minimalist interiors**
- When fitted, it allows the door to open **180 degrees**
- Suitable for flush doors with rebate or without rebate
- Suitable for fire & smoke resistant doors for up to **30 minutes**

INTRODUCING AGB

Made in Italy.

All products are manufactured in AGB's three Italian factories.

Innovation & Technology.

Technological excellence resulting in high quality products. AGB is currently one of the most technologically advanced companies in Europe.

Designed solutions.

AGB products are technologically advanced yet beautiful too. The design of each item is minimalistic, clear and linear.

CONCEALED HINGES

Minimalistic look hinges
Easy to install

AGB Cylinders

AUTOMATED ASSEMBLY

The dedicated cylinder manufacturing plant, the continuous investments in automation and the qualified staff, guarantee the AGB cylinders are expert pieces of hardware.

AUTOMATIC TESTS

AGB cylinders have to pass strict tests and controls in every step of production. Automatic controls are so accurate that they can simulate the movement of the hand turning a key. Every AGB cylinder has been tested before it is packaged.

Why intumescent?

All ironmongery installed on a fire door must be fitted without compromising the integrity of the complete fire door assembly. This is particularly important when ironmongery is rebated into the doorset such as hinges, locks and latches. To ensure our CE Certifire latches, dead bolts, locks and hinges are compliant, intumescent kits or pads must be fitted. These kits are flexible and pre-made with cut out lines that can be tailored to the item they are being fitted with. Check the fire rating of the door and ensure you fit the appropriate intumescent protection.

The Cotswold Manor

With Mediterranean Valencia fitted throughout, this home looks stately and yet homely at the same time. This designer lever looks stunning in a contemporary setting whilst emitting warm vibes. When fitted on solid and quality doors, Valencia in Polished Brass really feels like a statement piece.

the finish matters

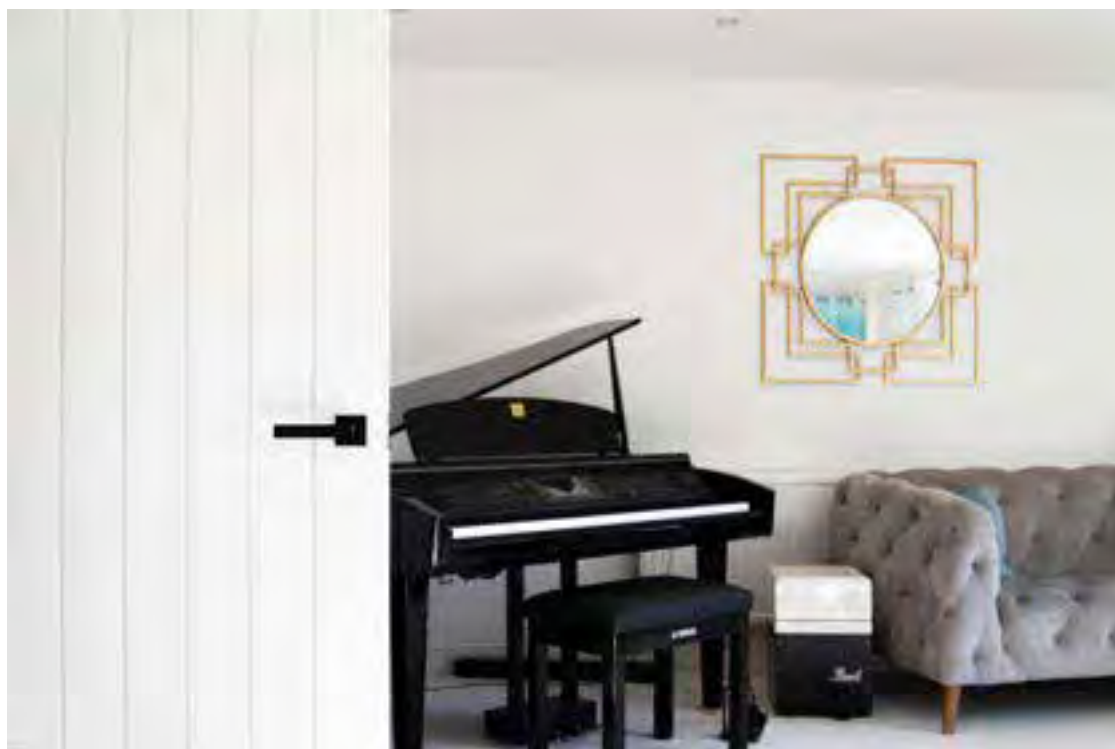

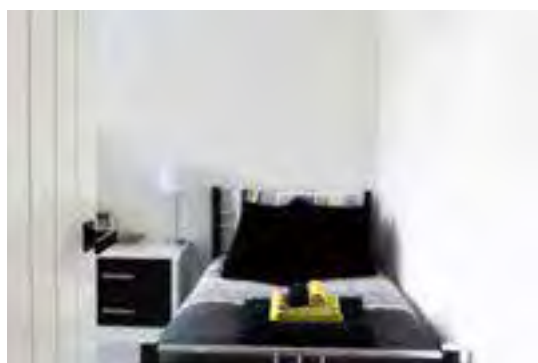

Sherwood

CleanTouch Forme Asti on Square Rose in Matt Black is featured in this minimalistic modern home. Paired with matching Matt Black hinges and magnetic locks and latches, this lever looks stunning. The contrast between the Matt Black ironmongery and the white doors creates a bold statement. These CleanTouch levers look glamorous... But they also offer protection. Finished with the anti-bacterial coating, CleanTouch Asti offers fashionable protection.

This lever is available in the Forme range, or the CleanTouch range (with anti-bacterial coating).

the finish matters

A modern minimalist home

This modern minimalist home has a clean palette throughout creating a perfect canvas for hardware in the Urban Graphite finish. Warm tones of pale stone grey in the kitchen cabinetry and plush carpets creates a harmonious blend with the relief in the Urban Graphite finish. This home features Forme Naxos on square rose in Urban Graphite.

the finish matters

The family home

For a perfectly practical and versatile option, this family home is furnished with Status Texas on round rose in Polished Chrome. The durable nature of this lever creates an ideal option for a busy and lively setting. Polished Chrome is a classic that will never date and therefore seamlessly suits any style of décor.

Beech Cottage

Beech Cottage is situated just outside the Yorkshire market town of Knaresborough. The 1930's cottage has been restored to embrace its heritage and yet combine a contemporary feel. Traditional Old English Ripon was chosen throughout the home. Satin Nickel adds the contemporary blend to this ironmongery.

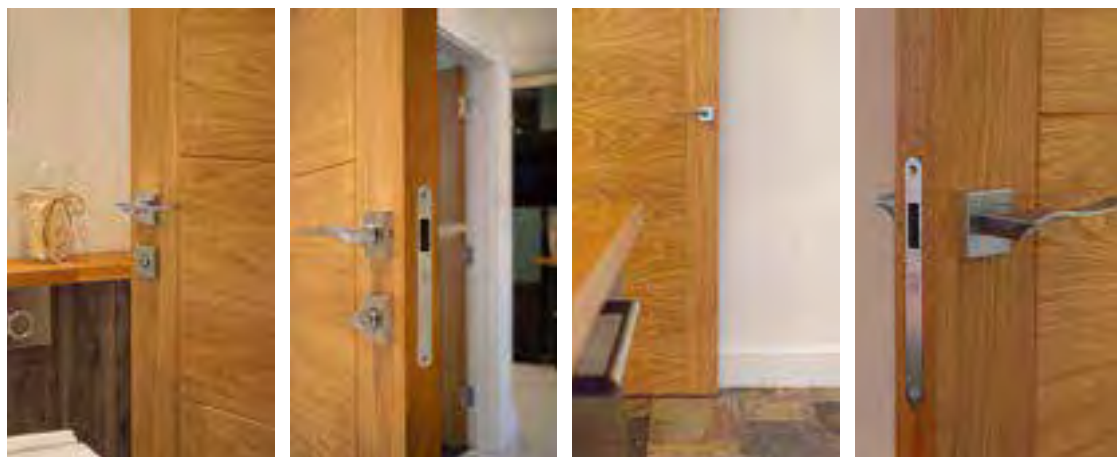

A home with a traditional twist

Warwick Lever on backplate in Matt Gun Metal creates a splendid blend between traditional and contemporary. Warwick is an all time classic, which creates an authentic feel within any interior. Warwick compliments both period and contemporary surroundings when styled in Matt Gun Metal.

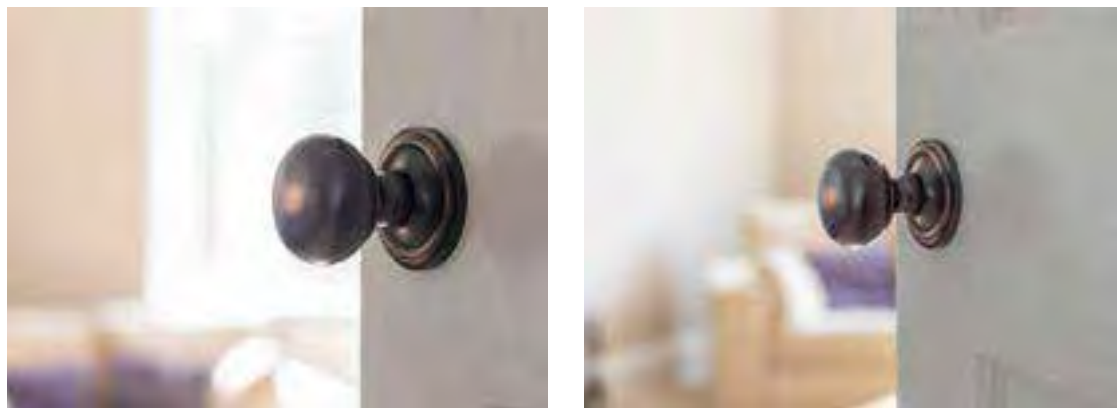

Modern and Flush Apartment

The Forme Olympia lever was fitted throughout this stylish new build with magnetic locks, creating a flush and modern aesthetic, and a seamless closing action. Satin Chrome creates a perfect finishing touch for a door with a wood grain.

A Refined Touch of Elegance

This family home was fitted with Old English Harrogate Mortice Knobs in Antique Copper. Traditional elements & character have been retained throughout the 1930's property, whilst a contemporary twist has been added. Antique Copper is perfect for creating this blend.

the finish matters

Choosing your Ironmongery

We believe the finish matters, and this factor makes the biggest difference to the final atmosphere created by the ironmongery within an interior. Therefore we recommend, you choose the finish of your ironmongery before going on to consider the style you require and then concluding with the functionality aspects.

Why not browse the finish inspiration on pages 8 to 11 to help you make a decision? Looking at real homes often helps - take a look at the case study pages 154 to 159. Within each finish range there are multiple options of modern, flush, minimal, contemporary and traditional ironmongery styles - something for every required taste. Each period of house, from Victorian and Georgian to new build and contemporary homes, has a very particular feel to the building and environment. When deciding to replace door furniture it is important to consider this factor. Certain finishes will also lend themselves more than others to different periods of homes, for example Satin Brass within a minimal, classy and modern home, and Antique Brass in a characterful traditional home.

Perhaps one of the most basic and functional items to choose are your hinges, however, these still matter, and especially the finish of these! The type of hinges you choose will depend upon a number of factors...

- Style of the door
- The door frame
- The weight of the door

Typically, panelled doors would be fitted with butt hinges. A butt hinge is designed to be cut into the frame and the door so that is largely hidden from view when the door is closed. Thought should be given to the weight of the door in question as heavier doors may require additional hinges or a larger size hinge.

Fire doors will require a fire tested hinge. There are several finish focused options of pages 136-137. The size and number of hinges is determined by the size of the door. For a common domestic application door we would recommend 3no. X 3" hinges. If you have a fire door you should use 3no. X 4" Hinges. You should also use 4" hinges if your existing doors have 4" hinges to keep the same character within the door set.

You will need to consider the purpose of the door and whether it needs a locking mechanism. Generally, but not always, internal doors are not locked so a standard latch (non-locking) or latch and turn and release (commonly used on bathroom doors) would be sufficient. A standard latch is simple to use and only requires the door handle to be pushed down for the door to open. The size of the latch required is determined by how far into the door you would like the door handle to sit. If an internal door does need a locking facility, a standard 3 lever lock would be an option to consider. If a fire door is used, fire tested latches and locks must be fitted with intumescent pads as the fire test specifies.

Consideration will need to be given to whether a door knob or lever handle is preferred for opening and closing the door. Levers are available in square or round rose or on backplate. Square rose is a very popular option in modern style interiors, while round rose is a contemporary or classic alternative. Levers on backplate are often regarded as a more traditional option.

Supply Policy

We distribute our quality products through a strong network of registered stockists including trade and retail outlets throughout the UK. This includes Architectural Ironmongers, Builders Merchants, Door Retailers, other Independent Shops and online stockists.

Get in touch with to find out where your nearest stockist is!
Call 0845 682 0300 or email info@hotellockandsafe.co.uk.

Maintenance and Care Guide

Our unique and bespoke finishes have been carefully matured and developed over many years. We are proud to offer a complete range of hand-applied, quality, finish-focused products which provide customers with the option to create a full matching door set in a huge range of trending colours.

We do not recommend using our products externally, unless they are brass based. Zamak products would deteriorate in a matter of weeks or months due to extreme temperature change. By contrast, Solid Brass-based door handles and knobs will last for many years under normal external circumstances. We do not recommend using our products externally in coastal areas due to the high levels of atmospheric salt, as this will rust or tarnish most finishes.

In the unusual event of products failing mechanically, we will replace it free of charge, providing you can supply us with the faulty product and a receipt to show proof of purchase. If the items are not fitted in accordance with the fitting instructions, in a correct application, this may not apply.

All our products have a bespoke applied finish, and we recommend regular cleaning with a clean, moist, soft cloth. If necessary, you may moisten the cloth, with water. Any form of chemical cleaner could permanently damage the finish. Under no circumstance should you use an abrasive/hard tool, chemical, acidic or abrasive substance to clean our products. The finish may chip or scratch if subjected to impact from sharp items such as keys and jewellery; rings in particular. Atlantic UK retain the right to send items away for chemical testing to analyse if the product has come into contact with any abrasive or chemical substance before issuing replacements.

Please be aware that environments where there is high concentrations of chemicals in the air, for example from use of low quality paint or corrosive agents, corrosion and damage may occur to the surface of the hardware. Our products should therefore not be fitted in such environments, until the high concentration of chemicals in the air have subsided.

We recommend periodically oiling and cleaning any moving parts on all products to ensure they perform to their full capacity, and to remove any harmful deposits that build up on the surfaces. This will aid protection from environmental factors.

Fitting Advice

The fixing kits supplied with our products are bespoke and carefully crafted specifically for their coordinating product. We would always recommend that a pilot hole is drilled, especially into hard woods, for all our fixings. Ideally it is suggested that screws are rubbed with candle-wax before fitting to ease the application. Please take the utmost care when fitting our screws to preserve the finish. We recommend that along with drilling a pilot hole, a well-fitting screwdriver should be used. Please avoid fixing by way of an impact driver or drill operated screwdriver, due to the hand-made nature of the fixings. Extra screws can be purchased, to replace lost or damaged screws. Please enquire for further details.

If you have any questions, please email info@hotellockandsafe.co.uk.

Bespoke Services

Looking for something a little exclusive?

Go bespoke with our stunning range of made-to-order, Italian door handles. More than 200 designs available in over 30 finishes. Be creative, be unique, be you!

If you have any special product requirements that we don't already cover, we will happily consider any bespoke work such as a custom finish or manufacturing. Minimum order quantities may apply to these made-to-order items.

Simply email sales@atlanticgb.com or ring 0800 9020 486 with your requirements!

**Hotel Lock
& Safe LTD**

dorpac

Dorpac® is a bespoke service delivered by Atlantic, which offers everything needed to fit a door in one concise box. Any choice of lever with a latch and hinges to match. Upgrades are also available for bathroom's and locking doors.

Available in all our unique finishes.
Get in touch for more details.

Our Manufacturing Processes

Hotel Lock & Safe take care of people and their environments are regarded very seriously. At every stage of our manufacturing process, being socially aware and protecting the environment is critical.

The Ecotech manufacturing process used to finish our Forme Italian products, is an innovative method using nanotechnology. It is a coating that takes place in a vacuum environment. This process is characterised by a dry, cold and without chemical finishing process.

Find out more
about Ecotech:

What are the benefits?

- ④ Cleaner technology
- ④ Process is less harmful to the environment & people involved
- ④ High resistance to abrasion
- ④ Uniform Coating with the possibilities of achieving innovative colour
- ④ Unbreakable bond between finish and metal (Zamak & Brass)

All sizes shown are approximate and we reserve the right to change them where necessary and without notice. Colours may vary from the actual products shown due to photography and print techniques. Finishing on some ranges may vary slightly from one batch to another, due to the hand finishing technique. All of our zamak and zinc alloy designer levers are designed for internal use only, and therefore the guarantee is voided if fitted externally. All products should be comprehensively checked before fitting commences.
